For the attention of Mr. James Richardson - Civils Lab Manager

Dear Mr. James,

Please be informed that effective 1st January, 2011 the services of your technical staff at RMG Batching Plant at Ras Laffan will no longer be required due to the cessation of the supply of readymix concrete to the Pearl GTL Project.

As our contract with Qatar Shell ceases to exist after the 31st of December, 2010, your staff will be demobilized from the site on 1st January, 2011. However, any cubes that are required to be tested will be sent to you at your Doha Laboratory for crushing.

We take this opportunity to thank you for your support and the excellent services rendered for on-site testing on Pearl GTL Project and wish you all success on your future projects.

Yours faithfully
For RABBAN MEDGULF (W.L.L.)

Michael John Luker
Project Manager
